What is U-Link?

The innovative technology that gives you new power

An exclusive Bft innovation: U-Link (Universal Link) is an exclusive Bft platform that allows the creation of technological ecosystems. In Home Automation Access, it allows communication with all the home access automation devices of any brand. So you save time and can control everything with ease, without any worries.

It is intuitive
Easy to install and use

It is scalable
Allows an unlimited number of devices to be added

It is flexible
Allows the creation of groups of interconnected products

It is practical
Works with or without a web connection

It is functional
Parameters can be controlled remotely via dedicated applications

All in one scheme: discover this amazing technology

A unique platform allowing the creation of technological ecosystems offering a wide range of solutions for different sectors.

Thanks to the **B-Eba** cards and the **Clonix U-Link receiver, this proprietary platform featured by Bft products adapts to any protocol and access automation product** (even non-Bft and old generation), and **is used in various sectors**.
Each device thus becomes smart and can be interconnected with other systems, thanks to a language that becomes universal.

U-Base 2

Software to install, easily and comfortably carry out maintenance and identify any malfunction of U-link compatible operators.

U-SDK

U-Sdk is the innovative application that can make Bft automation systems compatible and easily integrated with a BMS network for the supervision of buildings.

Magistro

An innovative and easy to install system for easily managing all the home automation.

U-Control

U-Control is the application that helps the simple and quick integration of BFT automations in large building management systems.

Blue-Entry

Technology abreast of the times and attentive to daily needs: thanks to the use of U-link the house gate can now be opened with just your smartphone.

Clonix U-Link
Allows the connection of old-generation products or non-Bft products to U-Link systems.

Old-generation Bft operators or a product belonging to other brands: can they be connected to U-link? Yes, thanks to the Clonix receivers. Accessories that know no limits.

B-eba
A direct line with your operators.

B-eba expansion cards allow the connection of external devices, such as PCs, smartphones and tablets, to a Bft operator or Clonix receiver, or the connection of several Bft products in a U-Link network. These accessories integrate with U-Link technology and Bluetooth, Z-Wave, TCP/IP protocols, as well as the RS485 serial connection.
A device that fully translates what Bft intends as interconnectivity.
